

BRIDGE-AI SUMMIT 2026

Building Regional Medical Innovation in Digital Growth and Education through AI
"Shape the Future of Digital Health"

Digital Health Innovation Competitions

20–21 July 2026 | Bangkok, Thailand

Organized by
Faculty of Medicine, Chulalongkorn University

Part 1: Competition Overview

1.1 Objectives

The Digital Health Innovation Competitions constitute a central component of the BRIDGE-AI Summit 2026. The competition aims to:

- Provide a platform for students, academics, healthcare professionals, and researchers to develop and showcase digital health innovations in Thailand
- Advance the application of knowledge and experience in digital health education
- Promote the dissemination, scaling, and real-world implementation of innovative solutions

1.2 Competition Format

The competition employs a multi-stage assessment model comprising project proposals, demonstration videos, exhibition booths, and stage presentations. The selection process is structured in three rounds:

- Round 1 Abstract Screening: The review committee evaluates all submitted project proposals and supporting documents.
- Round 2 Exhibition Booth Evaluation: Selected teams present their work at designated exhibition booths during the summit.
- Round 3 On-Stage Pitch Presentation: Shortlisted teams deliver live presentations before a panel of expert judges and conference attendees.

1.3 Eligibility

Group 1: High School Students & Undergraduate Students

- Status: Current high school students (Grades 10–12), or undergraduate students enrolled at any accredited public or private institution
- Team Composition: 1–5 members per team; members may be drawn from different year levels, faculties, or institutions
- Supervisor Requirement: A minimum of one faculty member or designated teacher must serve as the project supervisor

Group 2: Graduate Students, Medical Residents, Researchers, and Healthcare Professionals

- **Status:** Current master's or doctoral students, medical residents, researchers, or healthcare and health science professionals affiliated with an accredited academic institution or recognized training hospital
- **Team Composition:** 1–5 members per team; members may be from different faculties or institutions
- **Supervisor Requirement:** A minimum of one academic supervisor affiliated with a university or training hospital must formally endorse the project

1.4 Project Readiness Levels

The competition accepts entries at two stages of development:

Level	Description & Evaluation Criteria
Prototype / MVP	Innovations with a functional prototype or minimum viable product (MVP) already developed. Evaluation criteria: Functional performance; initial validation results with measurable outcomes; and scalability potential for real-world healthcare deployment.
Concept / Research	Innovations in the research, conceptual, or investigational stage without a physical prototype. Evaluation criteria: Clarity and significance of the identified clinical or public health problem; a well-supported conceptual solution framework grounded in evidence; and a concrete roadmap toward prototype development.

1.5 Application Process

The application process consists of two stages:

Stage 1 — Expression of Interest (EOI) 	Open for registration from 27 May 2026 onwards. Complete the online form at: https://forms.gle/jFe5fZdLRMreymm66
Stage 2 — Requirement Submission 	All required materials must be submitted no later than 26 June 2026 via: https://forms.gle/scJZzQeSLLSt7HPTA

Part 2: Award Categories and Evaluation Criteria

2.1 Award Categories

The competition comprises four award categories. Each applicant must submit to exactly one category that best aligns with the nature of their innovation.

2.1.1 Medical Education Award

Awarded to innovations in medical education and health sciences that advance learning and professional development. Eligible submissions include work in:

- Pedagogical methodologies and instructional design
- Clinical simulation and scenario-based training
- Curriculum development and learning assessment
- Tools and technologies that enhance the skills and competencies of medical students and health science professionals

2.1.2 Clinical Award

Awarded to innovations that demonstrably improve the quality of patient care and clinical outcomes through the application of digital technology. Eligible submissions include work in:

- Enhancement of diagnostic, therapeutic, and patient monitoring processes
- Design and optimization of patient care pathways and clinical workflows

2.1.3 Digital Technology Award

Awarded to innovations in digital health technology that advance healthcare service delivery and public health management. Eligible submissions include applications of:

- Health Information Technology (Health IT)
- Telehealth and remote patient care systems
- Hospital administration and operations management systems
- Digital health platforms and other digital technologies that substantively reform healthcare workflows and service delivery

2.1.4 Medical AI Award

Awarded to innovations demonstrating the effective application of artificial intelligence (AI) and machine learning in medicine.

Submissions must demonstrate model performance and accuracy in one or more of the following domains:

- Disease diagnosis and pathological classification
- Clinical outcome prediction and prognosis
- Medical image analysis and interpretation
- Clinical decision support systems

2.2 Awards

Award Level	Description
1st, 2nd, and 3rd Place + 2 Honorary Mentions	Awarded within each of the four categories. Evaluation is based on: Innovation Excellence, Clinical & System Impact, and Scalability & Sustainability.
Grand Prize (Winner of Winners)	The highest honor of the competition. Awarded to the most outstanding project from among the winners of all four categories (Medical Education, Clinical, Digital Technology, and Medical AI).

2.3 Evaluation Process

Round	Pool	Description
1	All Applicants → 90 Teams (30 Group 1 + 60 Group 2)	Abstract Screening: The review committee evaluates all submitted project proposals and documentation. Ninety teams are selected to exhibit at the summit's exhibition zone.
2	90 Teams → 30 Teams (10 Group 1 + 20 Group 2)	Booth Evaluation: Judges assess teams during the exhibition period. Thirty teams advance to the semi-final stage.
3	30 Teams → 8 Teams (4 Group 1 + 4 Group 2)	On-Stage Pitch Presentation: The first-place winner from each category within each group (4 categories × 2 groups = 8 teams) advances to deliver a stage presentation.
4	8 Teams → Grand Prize (1 Group 1 + 1 Group 2)	Grand Prize Selection: Two Grand Prize Awards are conferred — one to the highest-performing team from Group 1 and one from Group 2.

Part 3: Competition Application

3.1 Submission Requirements

All applicants are required to submit the following materials by the specified deadlines:

Item	Details	Deadline
1. Application Form (Google Form)	Team name, institutional affiliation, selected award category, and contact information.	25 June 2026
2. Project Abstract (Maximum 500 words)	Submitted in Thai or English (maximum 500 words). Must follow the prescribed structure: 1. Project Title / Category / Readiness Level / Team 2. Background and Significance of the Problem 3. Objectives and Value Proposition 4. Innovation Approach and Proposed Solution 5. Outcomes, Evaluation Plan, and Scalability	26 June 2026
3. Project Proposal (Full Proposal Document)	A complete written proposal comprising the following sections: 1. Project Title and Award Category 2. Team Members: names, photographs, and institutional affiliation 3. Background and Significance of the Problem 4. Objectives and Value Proposition 5. Innovation Concept and Proposed Solution	26 June 2026

	6. Methodology and Implementation Plan 7. Results Analysis and Expected Outcomes 8. Demonstration of Functionality (if prototype available) 9. References 10. Appendices: supplementary materials (if applicable)	
4. Pitch Deck (Maximum 15 Slides — PDF)	A presentation of no more than 15 slides covering all sections outlined in the Project Proposal. Submitted as a PDF file.	26 June 2026
5. Video Pitch Presentation (VDO Pitch — Maximum 5 Minutes, MP4)	A video presentation of no more than 5 minutes. The number of presenters is at the team's discretion. Submitted as an MP4 file.	26 June 2026
6. Exhibition Poster (A0 Format — PDF)	Required for all 90 teams selected to exhibit. Poster dimensions: A0 (84.1 × 118.9 cm). Submitted as a PDF file to the organizing committee for production and installation.	15 July 2026

3.2 Exhibition

The 90 teams selected in Round 1 (30 teams from Group 1 and 60 teams from Group 2) will be allocated individual exhibition booths in the summit's designated exhibition zone, located at the Bhumisiri Mangalanusorn Building, Floors 12–13, King Chulalongkorn Memorial Hospital, on 20–21 July 2026.

Each participating team is required to:

- Submit an A0-format exhibition poster (84.1 × 118.9 cm) as a PDF file to the organizing committee no later than 15 July 2026, for printing and installation
- Prepare and operate a live demonstration of the innovation at the booth (e.g., laptop, tablet, working prototype, or other demonstration materials)
- Ensure that at least one team representative is present at the booth throughout the exhibition period on 20–21 July 2026 (09:00–17:00)

3.3 On-Stage Pitch Presentation

The eight teams advancing to the final round (4 teams from Group 1 and 4 teams from Group 2 — the first-place winner from each category per group) will deliver on-stage presentations on 21 July 2026.

Component	Duration	Format
Presentation	5 minutes	Slide-supported delivery with live demonstration
Q&A Session	5 minutes	Questions from the judging panel
Total per Team	10 minutes	

3.4 Recommended Presentation Structure

The following structure is recommended for the Pitch Deck and On-Stage Presentation:

Slides	Content
1–2	Background and Significance of the Problem Present an overview of the clinical problem or healthcare system challenge being addressed. Describe the real-world context, affected population, and the scope of the problem both qualitatively (e.g., patient or clinician quality of life, societal burden) and quantitatively (e.g., patient volume, workload, cost, error rates). Identify current system gaps and articulate why this problem requires urgent intervention. Assertions should be supported by statistical data, published research, or empirical evidence.
3–4	Objectives and Value Proposition Articulate the primary objectives of the project, tracing from the identification of deep user or clinical needs through to the project's hypothesis. Assess the value of the innovation across social, public health, and health economic dimensions. Clearly differentiate this innovation from existing solutions.
5–7	Innovation Approach and Solution Describe the conceptual basis for the innovation and its intended deployment, covering the development process, system architecture, key features, and selected technology stack. Provide a before-and-after comparison illustrating the innovation's impact on the problem. Reference the academic principles, theories, or prior research supporting feasibility. For projects involving health data or human subjects, describe the data collection and analysis methodology, user testing procedures, and applicable ethical protocols (data privacy compliance, Institutional Review Board approval where required).

8–10	Results and Evaluation Present development and testing outcomes using both quantitative and qualitative measures (e.g., reduction in processing time, reduction in error rates, improvements in accuracy, user satisfaction scores). Describe the evaluation methodology and discuss findings in comparison with current standard approaches.
11–12	Feasibility and Scalability Plan Address the feasibility of real-world deployment within existing healthcare infrastructure, including system integration, user readiness, and anticipated constraints. Present cost structure, economic viability, and a forward-looking scaling plan — from departmental and hospital-level adoption to potential commercial application.
13–15	Conclusion and Recommendations Provide a concise synthesis of the project, connecting the identified problem, proposed solution, and achieved or expected outcomes. Acknowledge study limitations transparently. Propose a roadmap for subsequent development phases and articulate a long-term vision for the innovation.

Part 4: Competition Timeline

Milestone	Date	Details
Application Opens (Application Opens)	May 2026	Registration announced via the official website and all designated communication channels.
Expression of Interest (EOI)	27 May - 26 June 2026	Open for registration from 27 May – 26 June 2026. Complete the online form at: https://forms.gle/jFe5fZdLRMreymm66
Submission Deadline (Application Deadline)	26 June 2026	Final deadline for all required submission materials as specified in Section 3.1.
Round 1 — Abstract Screening (Abstract Screening)	27 June – 10 July 2026	The review committee evaluates all submitted project proposals and documentation.
Round 1 Results (Round 1 Results)	10 July 2026	Announcement of the 90 teams selected to exhibit at the summit's exhibition zone.
Exhibition Poster Submission (Poster Submission)	15 July 2026	Selected teams submit A0-format exhibition posters (PDF) to the organizing committee for production and installation.
Exhibition (Exhibition)	20–21 July 2026	Teams manage demonstration booths and receive judges and conference attendees (09:00–17:00).
Grand Prize — On-Stage Pitch (On-Stage Pitch Presentation)	21 July 2026	Category winners from Group 1 and Group 2 (8 teams total) deliver on-stage presentations to compete for the Grand Prize.
Award Ceremony (Results & Awards)	21 July 2026	Official announcement of results and awards presentation during the closing ceremony.

Part 5: Prizes and Benefits

Recipient	Benefits
Grand Prize Winners (1 from Group 1, 1 from Group 2)	Grand Prize Trophy and Certificate of Excellence
Category Winners (1st, 2nd, 3rd Place per Category)	• Award trophy and Certificate of Excellence • Opportunity to publish and disseminate work through Faculty of Medicine, Chulalongkorn University communication channels • Opportunity for future research collaboration with the Faculty of Medicine and Chulalongkorn University • Potential consideration for investor funding and partnership support
Honorary Mentions (2 per Category)	Certificate of Honorary Mention
All Exhibition Teams (90 Teams)	Participation certificate and the opportunity to present work at the official BRIDGE-AI Summit 2026 exhibition zone.

Part 6: Rules and Regulations

6.1 Competition History and Prior Awards

- New projects or projects currently under active development are eligible to apply without restriction. This includes projects that have previously received runner-up or honorary mention recognition at other competitions.
- Projects that have previously won a national or international First Place Award may only be submitted if the applying team can clearly demonstrate Significant Development beyond the previously awarded version. Qualifying development includes, but is not limited to: new feature development, target user expansion, additional clinical validation, or deployment in a new context. Final eligibility determination is at the sole discretion of the organizing committee.

Note: Projects identical to those that have previously received a national or international first-place award, without evidence of substantial further development, will not be accepted under any circumstances.

6.2 Intellectual Property and Ownership

- All submitted work must be original, developed by the applying team, and remain the intellectual property of the team.
- Submissions must not infringe upon any copyright, patent, trademark, or other intellectual property rights held by any individual or organization.
- For Medical AI submissions: All datasets used for model training or testing must be legally authorized for use and must comply with applicable research ethics requirements, including human subjects research protocols (where relevant).
- Medical AI submissions must include representative sample data (simulated or real test data) to enable assessment of the model's capability, feasibility, and accuracy.

6.3 General Regulations

- Each team may submit to only one award category.
- All finalists must present in person at the venue; remote or online presentations are not permitted.
- The decisions of the judging panel are final and binding.
- Presentations may be delivered in Thai or English; slide decks may be prepared in either language.
